Dear Mark:

We are very pleased with the Excavation Safety Awareness and the NUCA Excavation Safety and Competent Person training you conducted on our site last month. Your professional presentations surpassed our expectations and helped us provide our employees with a very beneficial excavation safety training event.

It was a pleasure working with you and your staff during the planning, execution and administration of this training. Also, we appreciate your tailoring of the awareness course to meet our needs.

We look forward to working with you and the HBTC staff again in the near future.

Sincerely,

Dan Miller

Safety, Security and Training Coordinator
