Dear Mark:

The Alabama Utility Contractors Association (AUCA) has been very pleased with the safety training services your company has provided us since 2009. Last year, your company trained over 200 contractor employees throughout the state of Alabama.

Several things have really impressed me since we began contracting with you to provide safety training:

- Instructors are knowledgeable about the subject matter and training materials
- Instructors arrive promptly and keep the class on track
- Instructors work very hard to involve those attending in the presentation
- Instructors have construction backgrounds lending them credibility

As Director of AUCA, I want to deal with companies who conduct business in a professional manner and who offer value for the training dollars being spent. Your company, your instructors, and your office personnel fit those objectives perfectly.

I strongly recommend your company to anyone inquiring about training options.

Sincerely,

Philip Lee

Philip Lee
